SAFFERY CHAMPNESS, GUERNSEY

The Guernsey office of Saffery Champness is one of the largest independent providers of fiduciary services on the Island, meeting its clients' needs for confidentiality and the preservation and enhancement of their wealth through the formation and administration of offshore trust and company structures, and the provision of ongoing advisory and compliance services.

Assets under our administration span a wide range of classes totalling billions of pounds, ranging from quoted and unquoted investments through to private and commercial property and many other types of alternative investments. Unlike some trust companies, we do not have restrictions on the types of assets that we will manage, but will consider each client's individual requirements. In addition to fiduciary services we are able to provide a full range of local accounting and tax services.

We are practised at operating alongside other professionals as client needs dictate and in many cases work with our clients to create integrated solutions across their related financial and business affairs. With the additional support of our firm's mainland practice and through our membership of international association Nexia International, our clients are able to access considerable expertise across the globe.

Our presence on Guernsey was established in 1977 with a single resident Partner and has grown rapidly since then to become a substantial practice on the Island, employing approximately 100 people.

Guernsey

The Bailiwick of Guernsey consists of a number of Islands and is located in the Bay of St Malo. The Islands have one of the most stable and oldest Governments in the world and a benign tax environment with no capital, inheritance or sales taxes. Guernsey is a major international finance centre with a long history of fiscal independence and has a sophisticated infrastructure of banks, accountants, law firms and investment managers. Trust and company legislation is constantly monitored and updated to ensure that the Island maintains its competitive edge and has the added attraction of being industry, rather than Government, led. It is this combination of factors which has led to the remarkable growth in the Island's finance industry.

Services to Private Clients

Saffery Champness have been advising private clients in the UK for over 150 years. The Guernsey Office has built on this tradition and specialises in providing trust and company services to wealthy individuals and families from all over the world.

Our clients require our services for a wide variety of reasons which may include estate planning, asset protection or as part of the tax efficient structuring of their affairs. As an independent firm we can source support services such as investment management, banking arrangements or other wealth management facilities which will best suit each individual client. Our staff are professionally qualified with extensive experience, including technical and language skills, and we strive to provide a personal, efficient and added value service. We are proud of our employees and with low staff turnover always endeavour to build long standing relationships with all of our clients

Services to Corporate Clients

In addition to providing trust and company management services to private clients our office also establishes structures for corporate clients. Such clients may require companies managed in a tax neutral jurisdiction for international financing purposes or trusts for employee incentive schemes.

We have formed companies for stock exchange listings and manage a number of international employment companies. In conjunction with the company's own advisers we can recommend on the most efficient and appropriate structures.

In addition to the services already mentioned, our Guernsey office has specialist experience in the following areas:

Employee Benefit and Share Trusts

Frequently used by companies as a means of attracting, rewarding and retaining staff.

Family Offices

We manage family offices for a number of international families where we look after all aspects of their financial affairs and provide a form of concierge service.

Private Trust Companies

These are often, but not always, used as part of a family office structure and are popular with clients who may want a closer involvement with the management of the family trusts.

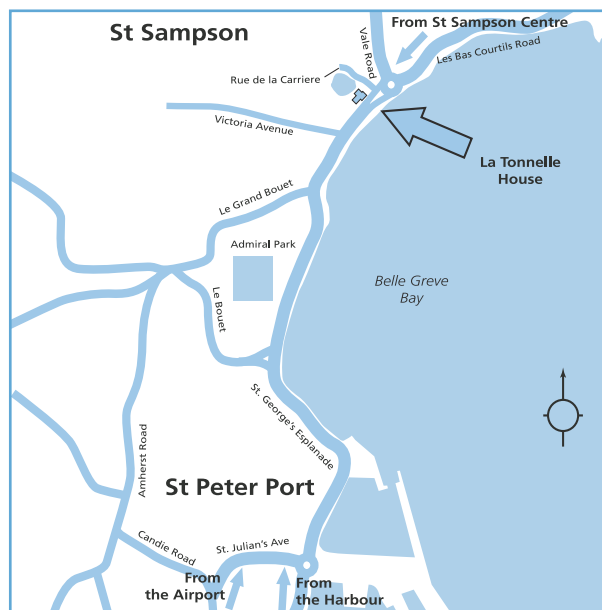

High Profile Clients

We have extensive experience in managing the affairs of clients who are in the public eye for media, business or political reasons where the emphasis may be on asset protection and discretion. We are also well practised in advising clients from some of the world's newer and fastest growing economies.
